

AHMAD BAIHAKI NUR

Fullstack Developer

Jakarta, Indonesia | HP: 085881861075 | Email: baihaki.dev@gmail.com | [Portofolio](#)

I'm a dedicated Computer Science graduate with a Bachelor's degree and a strong passion for transforming innovative ideas into functional, high-quality web applications. As a Fullstack Developer, I focus on crafting seamless user experiences, designing scalable architectures, and writing clean, maintainable code for both frontend and backend systems. I enjoy building solutions that combine intuitive design with robust performance while continuously exploring new technologies to improve my craft.

EXPERIENCE

Mitra FM – Jakarta, Indonesia

Freelance Fullstack Developer (Juli 2024 – Agustus 2024)

- Developed a broadcasting app using Flutter, enhancing user experience and accessibility
- Configured a VPS for radio broadcasting, ensuring a seamless and reliable streaming service
- Set up a local server to transmit radio signals to the VPS, optimizing broadcast efficiency.

PT Genggam Gemilang – Jakarta, Indonesia

Freelance Fullstack Developer (Juli 2023 – Februari 2025)

- Developed a **SMART LPDP** web application that incorporated advanced monitoring tools, automated reporting, and real-time transaction tracking
- Developed a **BPJS Kesehatan** Dashboard with real-time transaction updates and visual analytics for better oversight.
- Do the database migration process, redesigned the dashboard and integrating data visualization tools in **Institut Teknologi Bandung** Financial Monitoring System.
- Developed a dashboard and integrating data visualization tools in **Universitas Indonesia** Financial Monitoring System.
- Developed VA Management System for **Universitas Negeri Jakarta** that handles billing, and payments processing. And make the dashboard for user to access Summary, Projections, Cash In/Out details

PT Nusantara Infrastructure – Jakarta, Indonesia

Flutter Mobile Developer Intern (February 2024 - June 2024)

- Improved merchant application by upgrading UI/UX and adding features like vouchers, points system, E-Card top-up, and notifications.
- Proficient in using Google Cloud Platform and Firebase to develop merchant applications.
- Experienced in using Jira for project planning and organization, facilitating collaboration among team members and ensuring timely delivery of project milestones.

IQOS Indonesia – Jakarta, Indonesia

Freelance Fullstack Developer (August 2023 - April 2024)

- Actively participated in code reviews, receiving constructive feedback and implementing suggested improvements to enhance code quality.
- Collaborated with the development team to successfully deliver a key project in a customer management website.
- Independently developed and deployed small features, showcasing initiative and contributing to the continuous improvement of the product.
- Developed a device loan system website to manage warehouse inventory, track device history, and streamline the loan process, improving efficiency in inventory management and device tracking.
- Installed and configured servers, monitoring resource usage for all deployed applications to ensure optimal performance and uptime.

Synaptech – Jakarta, Indonesia

Fullstack Developer (June 2022 - Desember 2024)

- Developed and maintained web applications using PHP and Node.JS.
- Collaborated with the development team to analyze system requirements and propose effective solutions
- Implemented Database architecture and optimized queries for efficient data retrieval
- Worked closely with designers and UI/UX team to implement visually appealing and user-friendly interfaces
- Collaborated with cross-functional teams to deliver projects within specified timelines and budget constraints

GEN Tech – Jakarta, Indonesia

Freelance Fullstack Developer (June 2020 - June 2021)

- Developed a Computer-Based Test application for SMK SATRIA using PHP and Bootstrap, streamlining exam processes and improving user experience for both students and administrators.
- Developed E-Vote, Buku Anggota, and internal Application for MAPALA Organization in Budiluhur University
- Developing the PPDB application and redesigning the web profile to make it more attractive, user friendly, and robust.

PROJECT

Virtual Assistant LLM

Typescript, Next JS, Tailwind, Prisma, PostgreSQL

A virtual assistant integrated with a Large Language Model, to help students get quick information, remind them of classes, and help them choose the right study plan card.

Streak Flow

Typescript, Next JS, Tailwind, Prisma, PostgreSQL

A web app to help users build better habits and boost productivity through visual streak tracking and flow state optimization.

Notion Clone

Vue 3, Typescript, Tailwind V4, Express JS, Prisma, PostgreSQL, WebSocket, Vite

A note-taking application that replicates core Notion functionality. Features include block based editing, drag & drop, real-time collaboration, and note sharing.

Movie Scrapper API

Javascript, ExpressJS

Movie scrapper API taken from melongmovie.com

AkieBOT

Javascript, wa-automate

WhatsApp bot for group moderation, image creation, games, and many other features.

Kiryuu Komik Reader

PHP Native, Bootstrap 4

A Kiryuu clone website with improved user interface (UI) and user experience (UX), as well as being ad-free.

Athlete Performance Analysis

PHP, Codeigniter 4, Bootstrap 5

Analysis of rock climbing athletes' performance with automatic calculations

Komikie

React, Bootstrap 5

Komikie is a website for reading comics

Tracking Verification

PHP, Codeigniter 4, Bootstrap 5

Tracking Verification from area, regional, manager, and verifikator

TI Discord Bot

Javascript, Discord JS

Discord Moderation bot with many features.

CodeIgniter 4 User Managamet Template

PHP, Codeigniter 4, Bootstrap 5, MySQL

A Codeigniter 4 authentication & authorization template for easier development

Laravel User Managamet Template

PHP, Laravel, Bootstrap 5, MySQL

A Laravel 11 authentication & authorization template for easier development

EDUCATION

Mercu Buana University - Jakarta, Indonesia
Bachelor Degree of Informatics Engineering (2021 – 2025)
GPA: 3.79

ORGANIZATION

HiMTI Mercu Buana – Jakarta, Indonesia
Research and Technology (June 2022 – June 2024)

- Designed and implemented the HimTI website using Laravel and Bootstrap 5, streamlining information access and improving usability.
- Established and managed a Discord Community to enhance engagement among Computer Science students, promoting resource sharing and collaboration.
- Organized and led the Kelas CORE program, a mentorship initiative aimed at equipping freshmen with foundational Informatics Engineering skills.
- Leveraged new technologies to optimize workflows and integrate innovative solutions for student engagement.

VOLUNTEER

HiMTI Mercu Buana – Jakarta, Indonesia
Coding Course Instructor (March 2024)

- Teaching Web Programming: Trained 30 students of SMK Budi Mulia in creating a simple website portfolio using HTML, CSS, and Javascript.
- Result: Improved students understanding of the basics of web development on participant satisfaction survey
- Impact: Inspiring students to continue learning programming through creative projects outside of class

SKILL

Languauge:

- *Indonesian (Native)*
- *English (Capable of understanding spoken English; limited proficiency in speaking, with room for improvement)*

Programming Language:

- *PHP, JavaScript (TypeScript), Python, HTML, CSS, Dart*

Framework:

- **PHP:** *Laravel, CodeIgniter*
- **Javascript:** *Next.JS, Vue.js, Laravel, Prisma, Sequelize, React Native, React Expo, Express.js, JQuery*
- **CSS:** *Bootstrap, Tailwind*
- **Dart:** *Flutter*

Database Managament:

- *PostgreSQL, MySQL, Oracle DB*

IT Network System Administration:

- *Firewall Configuration, OS installation and configuration, DB Management, Router, Switch and firewall management, Troubleshooting and Problem resolution*

Tools and Platforms:

- *Git, Google Cloud Platform, Firebase, Jira, Cisco, Linux*

Office Software:

- *Microsoft Office (Word, Excel, PowerPoint), Google Workspace (Docs, Sheet)*

CERTIFICATION

- BNSP Software Engineer
- Oracle Cloud Infrastructure I
- Oracle Cloud Infrastructure II
- CCNAv7 Networking

ACHIEVEMENT

- 1st Runner Up of LKS IT NETWORK SYSTEMS ADMINISTRATION – 2018
